2019

Dear Clients,

As you have shown an interest in our natural Angus beef, we would like to provide you with some background information. Our registered Angus beef are born on the farm and remain here. We never use hormones and use antibiotics only if medically necessary (very rare). Our beef is considered "natural"; we cannot use the term "organic" as we do use some fertilizer and herbicides on the corn we feed the cattle.

We send our cattle to a federally inspected slaughterhouse. The sides are aged for at least two weeks. The beef is then cut and wrapped according to your instructions. We are billed by the butcher and thus bill you based on the hanging weight of the animal, typically 350-450 pounds per half. In addition, we pass on the cost of, cutting, wrapping and flash freezing on your bill. Historically, this was included in our price but it has more than doubled in the last several years, and different cutting and wrapping requirements result in very different charges, therefore we have decided to reduce the cost our beef, and charge actual cutting and wrapping charges.

We will be offering halves and quarters for sale this year. If you are only interested in a quarter, it works well if you find someone to split a half with you. That way you can have the beef cut to your specifications. We regret that we are not able to offer custom cutting for quarters at this time. Quarters will be divided as evenly as possible by the butcher. The typical half fills approximately four large laundry baskets. Due to waste and differences in cutting, you will end up with fewer pounds than the hanging weight. If most of your cuts are boneless, your order will obviously be less bulky.

Demand continues to grow faster than our supply, so it is very important that you get your reservation sheet back to us as soon as possible. All orders will be taken on a first come, first served basis.

We will be happy to answer any questions you may have. Check out our website at www.thunderviewfarms.com or call us at **845.985.2189 between 10 am and 8 pm**, or reach us by **e-mail** at tvangus@thunderviewfarms.com. We ask first time buyers to include a \$100 deposit. Please make your check payable to Thunder View Farms LLC. All customers who are ordering a half or more should complete the enclosed cut sheet and return it in the enclosed envelope at their earliest convenience.

If your friends are interested, you may copy this information or give them our number and we will send them a packet. **Note: This year we will offer you a \$25 discount on your order for each buying (other than ground beef) customer you refer.** Thank you for your interest in this healthy, premium product.

Sincerely yours,

Karen and Ric Coombe

Beef Breakdown Facts

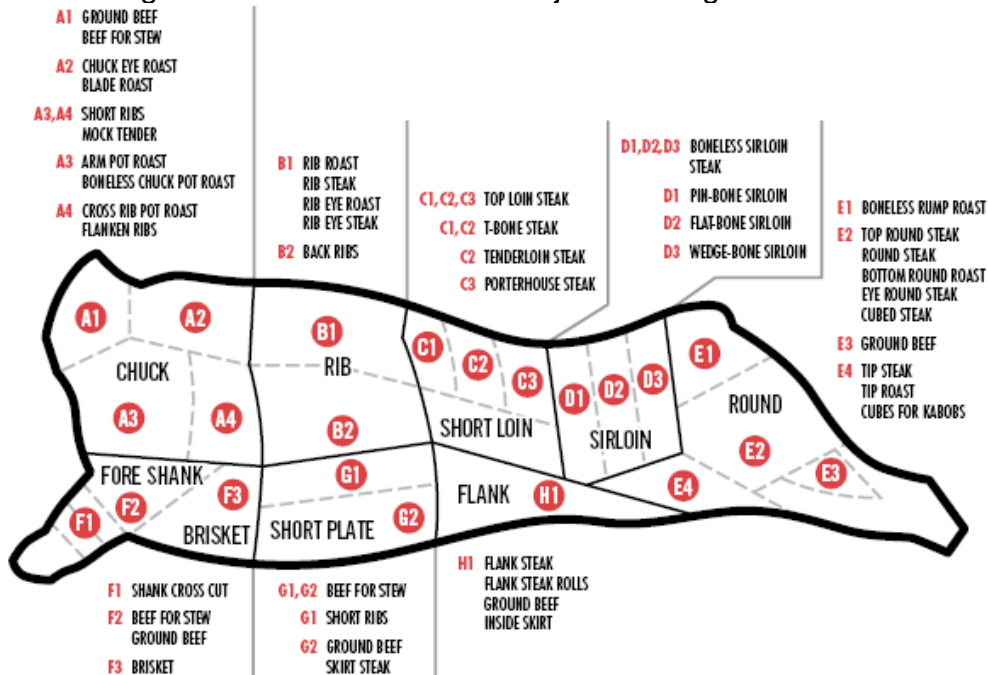

1. A 1200 pound steer yields about 500 pounds of retail cuts from a 750 pound carcass.
 - a. 22% are steaks
 - b. 22% are roasts
 - c. 26% is ground beef and stew meat
 - d. 30% is made-up of fat, bone and shrinkage
2. Each section of the half will yield certain particular cuts. Sometimes you must choose between them. For example, you can get a standing rib roast or you can get rib steaks. These choices are outlined on the attached cutting sheet.

3. The relative size of each section is:

a. chuck	26%	f. flank	4.0%
b. rib	9.5%	g. short plate	5.5%
c. short loin	8%	h. fore shank	4.0%
d. sirloin	9%	i. brisket	6.0%
e. round	27%		

4. Some cuts are suitable for broiling, pan broiling and roasting; some less tender cuts require longer cooking methods. (More information about this, including recipes, will be included in a packet that will accompany your first purchase.)

5. The diagram below shows where major cuts originate.
